

IT6105 Final Year Project Results (Failed List) 2017

Due to the failure of achieving the expected level, following students have to re-attempt the BIT Final year project in order to complete this module.

You can register for the project 2018 now. Students who have attempted the **same project twice** before (by facing viva) **MUST do a new project (different from their already evaluated project)** in order to complete the project module. Please note that you will be disqualified to continue the project even after the registration, if we found that your project is the continuation of the same project, which you have already attempted twice before.

Students who have attempted one topic only one time, are able to continue the same project with required improvements.

Students who did not achieve the expected level of the project in 2017
